MANAGING POLLUTED WATER RUNOFF

Households can prevent polluted runoff by picking up after pets and using, storing, and disposing of chemicals properly. Drivers should check their cars for leaks and recycle their motor oil and antifreeze when these fluids are changed. Drivers can also avoid impacts from car wash runoff such as detergents, grime, etc. by using car wash facilities that do not generate runoff. For more information, visit the U.S. Environmental Protection Agency online at www.epa.gov/nps.
