## Grease is a Hazard to Our Health

Residents should never dispose of cooking grease or cooking oils by washing them down the plumbing system or the storm drain. Oils pollute our streams and creeks by forming a film on the water surface and preventing oxygenation for aquatic life. Polluted water runoff can lead to severe State and Federal fines. As sewer pipes back up, food and sewage particles accumulate to create a health hazard by attracting insects and vermin. Soak leftover amounts of cooking oil with a paper towel and throw it in the trash, filter and freeze to reuse for another meal, or recycle cooking oil by calling the Fort Worth Household Hazardous Waste Collection Center at 817-871-5257.
