## Street Sweeping

Please be aware we will be having the streets cleaned this month. **Parking is prohibited on the side of the street being swept.**

The schedule will be:

- **January 18**—Alleyways
- **January 26**—Odd numbered side of the street
- **January 27**—Even numbered side of the street

## Managing Polluted Water Runoff

Households can prevent polluted runoff by picking up after pets and using, storing, and disposing of chemicals properly.

Drivers should check their cars for leaks and recycle their motor oil and antifreeze when these fluids are changed. Drivers can also avoid impacts from car wash runoff such as detergents, grime, etc. by using car wash facilities that do not generate runoff.

For more information, visit the U.S. Environmental Protection Agency online at [www.epa.gov/nps](http://www.epa.gov/nps).

## Recycled Christmas Trees

Waste Connections will help recycle your used Christmas trees. Just place your tree on your curb after the holidays. Pick up will be with your regular trash on Wednesday, January 5th as they are closed for New Years on Saturday, January 1st.

A promotional coupon for Hawks Creek. The background is dark green with a gold border. At the top right is the Hawks Creek logo. The main text reads "Meal Deal" in a gold script font, followed by "BLT, CHIPS, & FOUNTAIN DRINK" in bold white letters. A gold speech bubble contains "\$5". Below this, a smaller line of text says "Westworth Village residents can enjoy this deal any day in January". At the bottom left, a gold box contains the text "Not Redeemable for Cash No Cash Value". The bottom right features a close-up photo of a BLT sandwich on a wooden board.

## Cease the Grease—Holiday Grease Roundup

This year, from November 22—January 10, we will be participating in the **free** Holiday Grease Roundup. There will be a barrel outside the Public Works building at 128 Koldin Ln, available 24/7 to recycle your cooking oil and grease. (Motor oil and other automotive fluids are not accepted.)

Residents should never dispose of cooking grease or cooking oils by washing them down the plumbing system or the storm drain. Oils pollute our streams and creeks by forming a film on the water surface and preventing oxygenation for aquatic life. Polluted water runoff can lead to severe State and Federal fines. As sewer pipes back up, food and sewage particles accumulate to create a health hazard by attracting insects and vermin.
