Sewer Rate Averaging

REMINDER: On this month's bill, you will likely notice a change to your sewer rate. This new rate will remain in effect until next year's averaging. The average is based on your water consumption from December—February. This is an annual process, and is in line with industry standards. As the system is only able to meter incoming water, the city must rely on averaging in order to assess sewer fees. It should also be noted that sewer fees are charged at a higher rate, because the waste water requires processing to clean. The winter months are used for our averaging process because irrigation systems are least in use, meaning the incoming metering during this time is the most accurate estimation of water that is actually being returned to the sewer system. For residents that move in during or after this averaging period, the average of the entire city is applied as the rate to any new account until the next averaging period, at which time, their new rate will be based on their actual usage.

If you have any further questions regarding this process, please contact the Water Department at 817-710-2505 or by emailing krice@cityofwestworth.com
