## National Military Appreciation Month

National Military Appreciation Month (NMAM) is celebrated every May and is a declaration that encourages U.S. citizens to observe the month in a symbol of unity. NMAM honors current and former members of the U.S. Armed Forces, including those who have died in the pursuit of freedom.

Westworth Village honors all those who have served, and are currently serving, including our NAS JRB community.

## National Peace Officers' Memorial Day and Police Week

National Police Officers' Memorial Day is **May 15th**, and the week in which it falls, **May 10th—16th**, is National Police Week, which is a collaborative effort of many organizations dedicated to honoring America's law enforcement community.

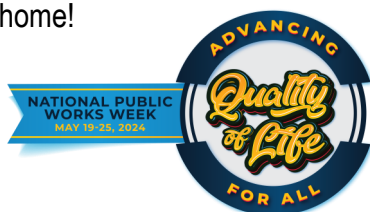

The Westworth Village Police Department serves our community with integrity, accountability, professionalism, service, courage, and respect 24 hours a day. While we are thankful to them every day, this week is a great opportunity to reflect on and show them extra appreciation for all they do and their immense sacrifices they make to ensure Westworth Village remains to be the safe, wonderful, family friendly community it is today.

## National Public Works Week

National Public Works Weeks is from **May 19—25th!** Our Public Works Team works tirelessly to accomplish many tasks that are vital to keeping our city functioning, safe, and clean! Their work includes maintaining the city's facilities and infrastructure, caring for our park, maintaining our water systems, and so much more!

Please join us in thanking them for all the hard work that they do to make Westworth Village such an incredible place to call home!

## How To Fly Your Drone Around NASJRB

The Naval Air Station Joint Reserve Base Fort Worth (NAS JRB Fort Worth) currently tracks an increasing number of unauthorized drone operations per month in the Class D airspace surrounding the base. These unauthorized flights present a significant danger to manned aircraft, especially those with only one engine. Many flights taking off and landing at the base are single-engine F-16s, F-35s or training aircraft, and military planes have already had to maneuver twice to avoid close contact with a drone.

To fly a drone in NAS JRB Fort Worth's Class D Airspace, you must submit a request for airspace authorization via the FAA's automated LAANC system. LAANC provides near-real time authorizations for operations within pre-approved altitude limits. Further coordination requests can be made to fly above pre-approved altitudes as long as the operation is under 400 feet. These requests must be:

- Submitted at least 72 hours in advance
- Reviewed and approved by an Air Traffic Manager for the controlled airspace.

In order to operate within the 0' altitude area around NAS JRB Fort Worth, a further coordination request must be submitted. These requests are only available to commercial Part 107 certified operators. Recreational operators may not operate within the 0' altitude area.
